

META PILLARS/ PRINCIPLES

- Learn products
 - Move fast
 - Build 'awe'
 - Be direct and humble
 - Focus on long term
 - Live in future
 - Meta, metamates, me
-
- Give people a voice
 - Build connection and community
 - Serve Everyone
 - Keep people safe and protect people
 - Promow ... Opportunity

Product Sense

- Understand the marketplace, problem, motivation
- Segment Audience
- Prioritization segments
 - Subsegments
- Pain points for selected segment
- RICE, Awe
- Solution, assumptions, trade offs

Design New Product (examples:)

- Design a product for an antique marketplace

Product Improvement

- How would you improve Facebook groups

Product strategy questions

- Should Meta enter the dating / jobs market?

Design New Product Steps

B	U	S	
OUTLINE APPROACH CLARIFYING QUESTION SAY WHAT PRODUCT IS Why should this exist How will it help complete FB goals - Clear Goal	Players in the ecosystem (fitness world, down to people working out) Who are the users High level actors (Buyers, sellers perusers, authenticators) - Subsegment - Collectors - Investors - First time buyers Pain points - At least 4 - Prioritize Criteria - How deep is the need, how frequent - Does it differentiate - How does fit with what we do Pick 3 pains Solution around Prioritize Metrics	List out 3 Prioritize Awe	
	Needs How can i assure privacy or integrity Struggle on content creation How can i promote How can i monetize How can i share well How can I plan better		

Product Improvement

Analytical Thinking

- What is the product (define assumptions)
 - Where does this fit

- Mission
- Who is involved (users)
- Brainstorm some metrics in the ecosystem
- Assess some favorites
 - Name risks
 -

Define success for

Steps

B	U	S	
Marketplace Relative to Meta Mission	Who is involved Multi-sided What are the actions	Clear Northstar - Tie to mission - Risks -	

TRADEOFFS

1. This metric over that metric
 - a. Clarify each
 - b. Layout context and assumptions
 - c. Look at the mission - tiebreaker
 - d. Pros and cons
 - e. Final (unless we have additional info)
2. Debugging
 - a. Define the metric change
 - b. Explore root cause (events at time (internal external) (history, season, year, internal external) (demographics impacted, version, browser, location culture
 - c. Isolate variables (rollbacks= watch),
 - d. Conclude
 - e.
 - f.
 - g.

PRACTICE

- product rationale (why does)
- additional angles to try

Goal setting

- Set plan

Measuring and monitoring

- Name - define
- Prioritize
- Evaluation
 - What about this another

Design a product for Finding Healthcare

Marketplace

Finding a Dr. Doctor could be a great way to expand Meta's services, while also aligning with Meta's mission of building community and connecting people with tech

Why

Navigating the space of finding healthcare, you'll quickly learn its a painful and disorienting process. You don't know anything about the Dr.

I think engagement would be a great objective

Users

health care provider

General physician

Specialist

Chronic Illness

In need of healthcare

Regular Checkup (general physician, allergist, dermat

Pain Points

- Finding highly rated
- That are availability
- Local

Sudden Issue (severity, H, M, L)

Chronic illness (

You are a PM at Meta thinking about a video conferencing product for small and medium businesses

- 1- Why might this be a good idea for meta
- 2- Pick Metrics

Okay thanks for that, can I clarify a little.

Small, being size of company or revenue, or other?

I'll assume small being 5-200, medium, are 200- 1000 people

Is this for American markets or other: american

Let me get a minute to gather my thoughts and walk through

Approach declare

- Lets chat about why this is good for meta (over arching mission)
- Who are the potential users
 - Small companies that want to not worry about learning onboarding a new tool
 - Medium size companies looking to communicate well and often
 - Remote companies, hybrid companies. Virtual conferencing is here to stay.

Mission

Create a product that allows meta users to have meaningful connections to video

As a

Folks who are creating meetings (#meetings created)

Attendees

Users who are listening to meetings after they occurred

#meetings created

RICE Risks

#avg meeting attendance rate

%meeting unattended

%meetings drop

#meetings cancelled

%meetings listened to

- What are some metrics
- Prioritize 1
- Let's discuss caveats and risks
